IS YOUR POS SYSTEM PA-DSS COMPLIANT?

PA-DSS (Payment Applications Data Security Standards) implementation is a concern for every merchant today. Merchants must choose equipment that meets specific credit card processing standards determined by the PA-DSS organization. These standards are designed to protect consumers against information leakage and credit fraud.

NON-COMPLIANCY CAN LEAVE A MERCHANT VULNERABLE TO FINES, CREDIT CARD DATA SECURITY BREACH, & LOSS OF BUSINESS

Your Sharp Point of Sale Dealer has a variety of COST-EFFECTIVE solutions that will make meeting the deadline an easy and worry-free experience.

SOLUTION 1:

Update your POS system ROM to one that does not retain credit card data on the unit or on receipts or reports.

SOLUTION 2:

Update the ROM Version without losing preset/program data using the SDW Back Office Software. A Sharp PA-DSS-Compliant ROM Version or POS System program data can be updated, programmed and installed faster than ever with SDW!

SOLUTION 3:

Upgrade to a Sharp PA-DSS Compliant POS System - If your equipment is aging and you've been considering upgrading to a new system, now is the time. Your Sharp dealer has advanced and reasonably priced systems that are right for your business.
